**Our Certificates**

## **ABOUT US**

**PRIME STAR FASHIONS**® was established in the year **1994** in the knit city of South India, Tirupur, as an “**Export House**” for the manufacturer and export of knitted garments. Right from beginning we aim towards enhancing customer satisfaction by means of supplying best quality knitwear on time and also possess a highly efficient communication system. The garment production units of the company covers various supplementary factories which can turn around **3.0 Million** pieces per annum.

## **INFRASTRUCTURE**

### **Manufacturing Units**

We have three separate units which are specialized in all knitted products.

We have a vertical administration and exclusive sampling division we have developed any specifications according to our customer needs with minimum lead time. Our factories follow a rigid factory rules and abiding to social policies over the years, we have established a perfect blend of facilities with latest and imported machineries from the world renowned manufacturers.

## **QUALITY POLICY**

We have background of fulfilling the specific quality demand of buyer as we are deeply committed to do it our products have unique distinction of combining quality of raw materials, fabric and garment ultimately ending up in a quality products.

Quality is assured by a team of experienced quality controllers who does random inspection to ensure high quality standards. Special inspectors are appointed to check and identify the defects at every stage.

### **Initial Inspection :**

Right from the initial stage our follow up starts, so we can identify and rectify any problems occurring at the early stage itself.

Our Laboratory testing can ensure the fabric to meet customer requirements. We implement the changes and correction from proto sample to pre-production sample and ensure the specification of our customers.

### **Online Inspection :**

The Bulk Stitching Production will proceed only after carrying the comments from the buyers ensuring the delivery goods with best results by daily monitoring Production process

### **Final Random Inspection :**

We perform final random inspection, when the total consignment is ready for shipment.

FRI is executed on specifications of our customers request and international Inspection Standards.

## **LABORATORY**

Synergizing men and machine cannot be complete without effective controls over quality. Company has in place a well-documented quality control program. Shrinkage, GSM, Crocking, Laundering and dimensional Stability are all checked with in-house Laboratory.

Other Test Requirements Done by Authorised Laboratories.

### **KNITTING**

We have brand new knitting machines with the capacity of **20,000 Kgs/day** in different fabric construction such as jersey, interlock and rib.

### **FABRIC PROCESSING**

We have tie up with modern dyeing plant with composite soft flow units, Our Fabric finishing units has imported advanced compacting machines, dryer and imported brushing machines.

### **EMBROIDERY**

Our sister concern embroidery division is equipped with 5 computerized 9 color 20 head machine from “**Barudan**” In-house editing facility is also available. we can do Monograms, applique embroidery and overall embroidery in this high speed machine.

### **PRINTING**

We have tie up with printing units which are equipped with automatic machine printing machines specialized for pigment, plastisol, Foam, Discharge, Non PVC, Flock, Glitter, Sticker Prints Etc. Which has capacity to produce **50, 000** impressions per day.

### **SEWING**

Our **1st** sewing facility is about **2400 Sq.mt** of **1+3** floor area with **200** latest garment sewing machines and other sewing related machines which has been imported from major companies such as Juki, Yamato, Brothers etc.

Our **2nd** sewing facility is about **2500 Sq.mt** of area with **75** production machines, Sampling room, Merchandiser's Office, Trims & Accessories Store, Laboratory and centralized cutting department.

The both garment divisions with modernized machines ensure bulk production of garments like all styles, T-Shirts, Polo Shirts, Night Wears, Jackets, Pyjamas, Leggings, Shorts and Sports Wears.

Our **3rd** facility is about **1000 Sq.mt** of area with raw material store and the fabric department equipped with quality checking machines.

### **SAMPLING**

Our sampling department with **25** Sewing machines and a separate sampling team works, faster with care to ensure that the samples are made quicker with perfect requirements of our customers
